CODECOM

CHDS Splice Panel 1U 2U 4U

The CODECOM CHDS SPLICE PANEL has been designed to splice the incoming fibers from high density backbone cables and for any fiber splicing need – Internal or External. The splicing is completed in user friendly and spacious plastic trays, with each tray supporting up to 144F ribbon splices or 72F loose tube splices. The splice panels are available in 1U, 2U and 4U options. Ease of install, ongoing maintenance is critical. The ability to break cables into different fiber counts and splice is a function of flexibility which many Data Centers are now applying for Cross Connect applications. This is a very flexible unit which focuses on ease of use and Security of each fiber.
